### ReactJS Events Management & Conditionals

1. Untuk langkah pertama, kita akan membuat sebuah folder dan didalam folder tersebut terdapat dua files yang berbeda yaitu exe1 dan exe2

2. Untuk langkah kedua kita akan menuliskan code html untuk exe1

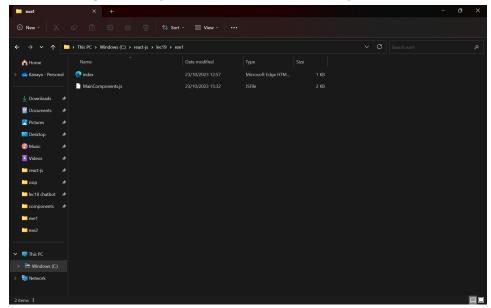

```
C:\react-js\lec19\exe1\index.html - Notepad++
Berkas Edit Cari Tampilan Pengodean Bahasa Pengaturan Alat Makro Jalankan Plugin Jendela ?
🚍 Content js 🔀 🔚 Footer js 🔀 🚍 Sidebar js 🔀 🚍 style css 🕱 🚍 index.html 🔀 🚍 MainComponents js 🔀 🚍 index.html 🗷 🚍 Gree
           <head>
                  <title>Calculator</title>
                  <meta charset="utf-8">
                  <meta name="viewport" content="width=device-width, initial-scale=1">

                  <script src="./MainComponents.js" type="text/babel"></script>
          </head>
          d<body>
                  <div id="app"></div>
          -</body>
         </html>
                                                                          length: 521 lines: 14
                                                                                                      Ln:13 Col:8 Pos:513
Hyper Text Markup Language file
```

3. untuk langkah ketiga kita akan menuliskan java script code untuk exe1

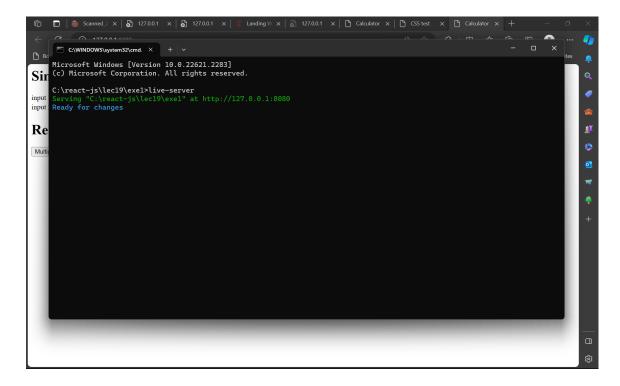

```
C:\react-js\lec19\exe1\MainComponents.js - Notepad++
                                                                                              - o ×

            class Header extends React.Component{
          constructor() {
              super();
              this.state = {
                  angka1:"0",
angka2:"0",
                   result:"0"
              };
          12
13
14
15
          funcMultiply = (val) => {
    var hasil = parseInt(this.state.angkal) * parseInt(this.state.angka2);
               this.setState({result: ""+hasil });
19
20
21
22
23
24
          funcDivide = (val) => {
              var hasil = parseInt(this.state.angka1) / parseInt(this.state.angka2);
               this.setState({result: ""+hasil});
          funcSubtract = (val) => {
               var hasil = parseInt(this.state.angka1) - parseInt(this.state.angka2);
               this.setState({result: ""+hasil});
                                           length: 1.483 lines: 51
☑ C:\react-js\lec19\exe1\MainComponents.js - Notepad++
                                                                                            - O X
Berkas Edit Cari Tampilan Pengodean Bahasa Pengaturan Alat Makro Jalankan Plugin Jendela ?
        📑 Footer, js 🔀 🕌 Sidebar, js 🔀 🛗 style.css 🔀 🛗 index.html 🗵 🛗 MainComponents, js 🔀 🛗 index.html 🗵 🛗 Greetings, j
           funcAdd = (val) => {
               var hasil = parseInt(this.state.angka1) + parseInt(this.state.angka2);
               this.setState({result: ""+hasil});
 34
          render() {
               return(
               <div>
                   <h1>Simple Calculator Reactjs</h1>
                   input 1:<input value={this.state.angka1} onChange={ (e) =>{this.setValue1(e.targe)}
                   <br/>
 40
                   input 2:<input value={this.state.angka2} onChange={ (e) =>{this.setValue2(e.targe
 41
                   <h1>Result:{this.state.result}</h1>
 42
                   <button onClick={this.funcMultiply}>Multiply
 43
                   <button onClick={this.funcDivide}>Divide</putton>
 44
                   <button onClick={this.funcSubtract}>Subtract
                   <button onClick={this.funcAdd}>Addition
               </div>
 47
              );
          1
      ReactDOM.render (<Header />, document.getElementById("app"));
```

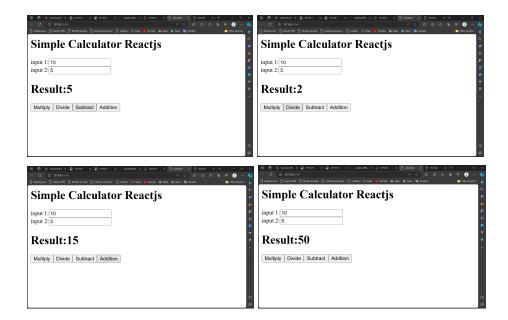

4. Dan untuk langkah keempat kedua code ini akan di simpan dalam file exe1

#### Output:

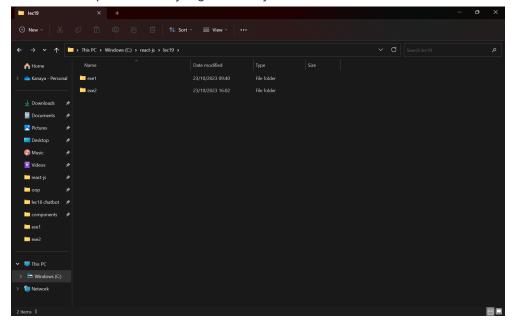

Kita akan membuka cmd dari file lec19\exe1 alu kita ketik live-server untuk melihat output dari program yang sudah dibuat.

#### Exe2

1. Untuk langkah pertama, kita akan membuat sebuah folder dan didalam folder tersebut terdapat dua files yang berbeda yaitu exe1 dan exe2

2. Untuk langkah kedua kita akan menuliskan html code

```
| Circuit-julct/PromeZindex/bull-Netpad++ | Circuit-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-julct-ju
```

3. Untuk langkah berikutnya kita akan menuliskan js code (component Greeting)

```
| Cross-picker-Penez-Generalization-Noting and Progress | Company | Company
```

4. Langkah berikutnya menuliskan js code (component button)

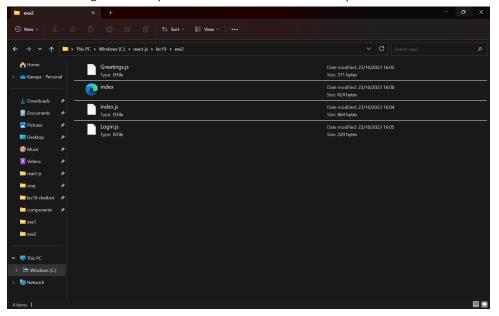

```
| Conscipled Management | Conscipled Management | Conscipled | Conscipled Management | Conscipled Mana
```

5. Langkah berikutnya menuliskan js code (component handle login)

```
Betas Iot (an impedia Pengolean Bahasa Pengaturan Alat Makro Markan Pugin kended ?

| Colst |
```

6. Dan untuk langkah keempat kedua code ini akan di simpan dalam file exe2

## Output:

Kita akan membuka cmd dari file lec19\exe2 lalu kita ketik live-server untuk melihat output dari program yang sudah dibuat.
